

Summer Term Year 1

My Writing Targets

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations, 1999).

There are a number of reasons why the world population is ageing. First, the number of people who are under 15 years of age has decreased from 1.1 billion in 1990 to 0.9 billion in 2000. This is due to a decline in the birth rate, which has been caused by a number of factors, including a decline in the number of children born to women, a decline in the number of children born to women who are under 15 years of age, and a decline in the number of children born to women who are over 35 years of age.

Second, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-communicable diseases, and a decline in the number of people who die from accidents and violence.

Third, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-communicable diseases, and a decline in the number of people who die from accidents and violence.

Fourth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-communicable diseases, and a decline in the number of people who die from accidents and violence.

Fifth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-communicable diseases, and a decline in the number of people who die from accidents and violence.

Sixth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-communicable diseases, and a decline in the number of people who die from accidents and violence.

Seventh, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-communicable diseases, and a decline in the number of people who die from accidents and violence.

Eighth, the number of people who are 65 years of age and over has increased from 0.2 billion in 1990 to 0.5 billion in 2000. This is due to a decline in the death rate, which has been caused by a number of factors, including a decline in the number of people who die from infectious diseases, a decline in the number of people who die from non-communicable diseases, and a decline in the number of people who die from accidents and violence.

This term in my writing I am working on these things and I should be able to:

- ☐ Name all the letters in the alphabet in the right order
- ☐ Spell up to phase 5 words and most words from the Y1 list
- ☐ Use syllables in words to help me spell longer words e.g. playground
- ☐ Use full stops, capital letters, and increasingly ? !
- ☐ Check my writing makes sense
- ☐ Use 'and' to make longer sentences

Continue to encourage me to say my sentence out loud before writing it

Always make sure I am using correct letter formation

Ask me, 'What do you have to check for now in your writing?'

Say, 'Does the spelling of that word look right?'

Say, 'You know how to spell 'look' so how do you think we spell shook?'
